

The Right-Fit Option That's Aligned With a Dentist's Needs

Give your customers a unique advantage with **tune**,[®] an affordable and effective clear aligner solution.

The clear aligner business is booming. Give your dentists access to a reliable treatment option that's affordable and provides their patients with optimal results.

Stand out as the clear choice with Tune, an innovative way to meet the growing demand for clear aligner solutions.

ALIGNMENT IS EVERYTHING

The Other Guys

Many competitors don't give doctors the ability to actually make the desired changes or improve cases during review, leading to **long processing times**.

Other aligner providers require setup fees and monthly premiums, **raising costs for dentists and patients**.

Other case planning software have refinement rates that exceed 70%, meaning **more treatment stages and higher costs**.

At-home aligners appear attractive because they cost less, but often they lead to **more treatment stages and less effective results**.

Other aligner materials may **adapt poorly to patients' mouths**, lose force quickly and stain or streak easily.

DOCTOR-LED OR DIY?

ALIGNER MATERIAL

tune[®]

Tune leverages G&H Orthodontics' 45 years of expertise to provide **expert case planning recommendations** or allow the doctors to take control.

Tune offers **effective doctor-led treatment at a fraction of the cost**, expanding patient access and profit potential for dentists.

Tune's individual case planning gets results – a **5% refinement rate** and **20% fewer aligner stages**.

With Tune, professionals control the products and materials from case planning to aligner delivery, to manage a **better patient experience and outcomes** – all at competitive prices.

Tune aligners use **Zendura FLX™ streak-resistant material** for best-in-class tooth movement and patient comfort during each treatment stage.
