The Right-Fit Option
That's Aligned With a Dentist's Needs

Give your customers a unique advantage with tune,™ an affordable and effective clear aligner solution.

The clear aligner business is booming. Give your dentists access to a reliable treatment option that's affordable and provides their patients with optimal results.

Stand out as the clear choice with tune, an innovative way to meet the growing demand for clear aligner solutions.

ALIGNMENT IS EVERYTHING

| The Other Guys		tune™
Many competitors don't give doctors the ability to actually make the desired changes or improve cases during review, leading to **long processing times.**	**CASE PLANNING SUPPORT**	tune leverages G&H Orthodontics' 45 years of expertise to provide **expert case planning recommendations** or allow the doctors to take control.
Other aligner providers require setup fees and monthly premiums, **raising costs for dentists and patients**.	**AFFORDABILITY**	tune offers **effective doctor-led treatment at a fraction of the cost**, expanding patient access and profit potential for dentists.
Other case planning software have refinement rates that exceed 70%, meaning **more treatment stages and higher costs**.	**REFINEMENT RESULTS**	tune's individual case planning gets results – **a 5% refinement rate and 20% fewer aligner stages**.
At-home aligners appear attractive because they cost less, but often they lead to **more treatment stages and less effective results**.	**DOCTOR LED OR DIY?**	With tune, professionals control the products and materials from case planning to aligner delivery, to manage a **better patient experience and outcomes** – all at competitive prices.
Other aligner materials may **adapt poorly to patients' mouths**, lose force quickly and stain or streak easily.	**ALIGNER MATERIAL**	tune aligners use **Zendura FLX™ streak-resistant material** for best-in-class tooth movement and patient comfort during each treatment stage.

FAST, AFFORDABLE, EFFECTIVE

5%
Average refinement rate of 5%

20%
Up to 20% fewer aligner stages to reduce touch points

150%+
Enjoy 150% greater orthodontic performance at Day 7
